

**I. Amendments to the Specification**

Please replace paragraph [0048] with the following amended paragraph:

[0048]       The air-bag may be attached to a gas generator 40 which in turn may be connected to a collision and roll-over sensor 42, as shown in Figure 4. The air-bag may be folded in a concertina manner with folds parallel to the axis defined by the gas flow passage. The folded air-bag is encased within a sleeve or a housing 44. A plurality of mounting tabs 14 extend through and protrude from apertures 46 (apertures 46 are schematic) formed in the upper side edge of the sleeve or housing, and the straps 34, 36 extend from the air-bag and protrude through the ends of the sleeve or housing 44.
